Who Is the User?

USER PERSONA

Alex Chen

Age 25 · Recent grad, first job

💰 $500/mo to invest

😤 Frustrations

- Overwhelmed by financial jargon & brokerage forms
- Doesn't know where to start with index funds
- Afraid of making the wrong call without guidance

🎯 Goal

- Start building a retirement portfolio - fast, simple, no advisor needed

> *Alex meets Chatfolio, which is zero jargon, zero forms, Just a conversation.*

Core Tasks Supported

WHAT THE SYSTEM DOES

01

Goal Elicitation

Conversational intake: The AI asks 4 natural questions about goal, timeline, budget, and risk tolerance. Guided and clear options.

02

Portfolio Generation

Based on your answers, ChatFolio recommends a diversified mix of low-cost index funds. Allocations are explained in plain English.

03

Growth Projection

Shows Conservative, Expected, and Optimistic growth scenarios over time using historical returns - with a 30-year projection table and chart.

How It Works

SYSTEM WALKTHROUGH: 4 STEPS

Welcome & Onboarding

User lands on ChatFolio. The AI introduces itself and explains the process - no sign-up required.

01

Conversational Intake

AI asks 4 guided questions: goal, timeline, monthly budget, and risk tolerance. Profile builds live in the sidebar.

02

Generate Portfolio

User reviews their profile summary and clicks 'Generate My Portfolio' to trigger the recommendation engine.

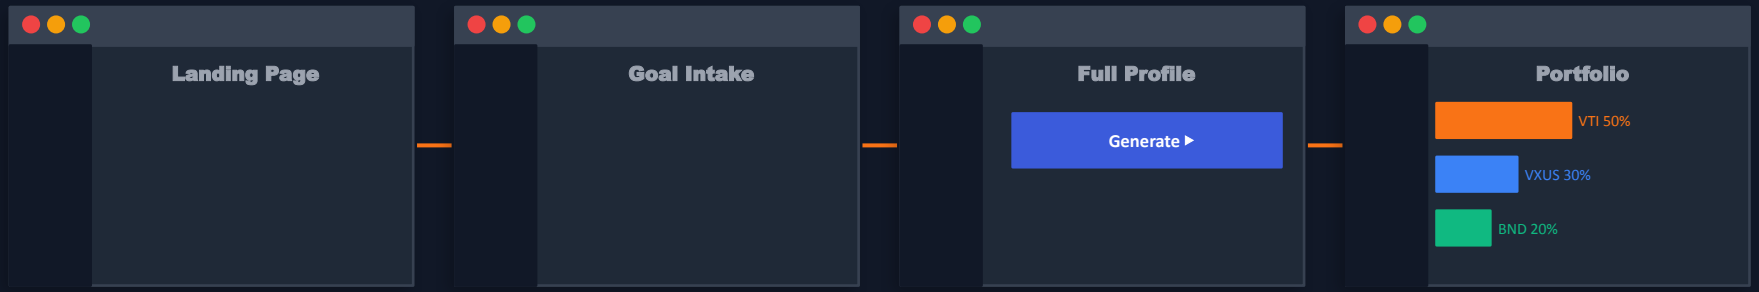
03

Portfolio & Projections

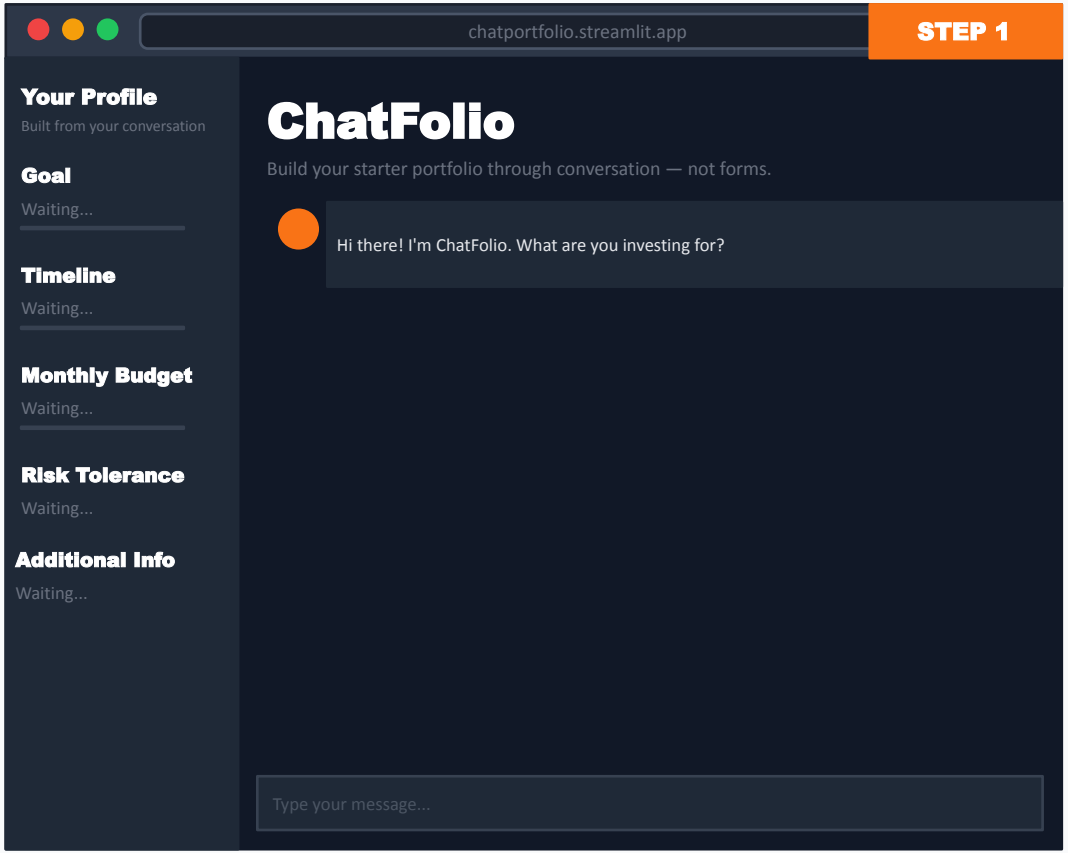
ChatFolio delivers fund allocations, a growth projection chart, and step-by-step setup instructions.

04

Live at: chatportfolio.streamlit.app



Step 1 - Welcome & Onboarding



"What is ChatFolio?" panel

Expandable info card explains the tool's purpose and what it will ask.

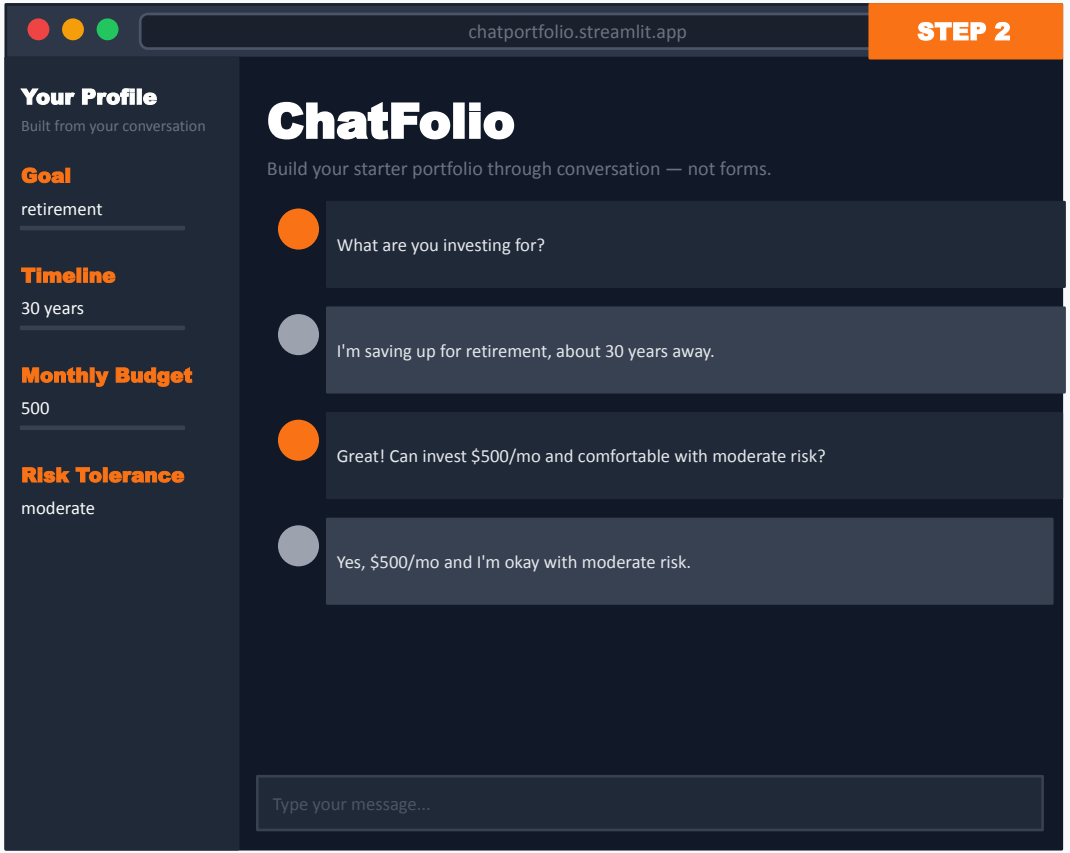
AI opens the conversation

First message sets the context with no login, no landing page form.

Live profile sidebar

All 5 profile fields start as 'Waiting...' and fill as the conversation unfolds.

Step 2 - Conversational Intake



Real-time profile update

Each answer populates the sidebar instantly. Goal, Timeline, Budget, and Risk all fill as the conversation progresses.

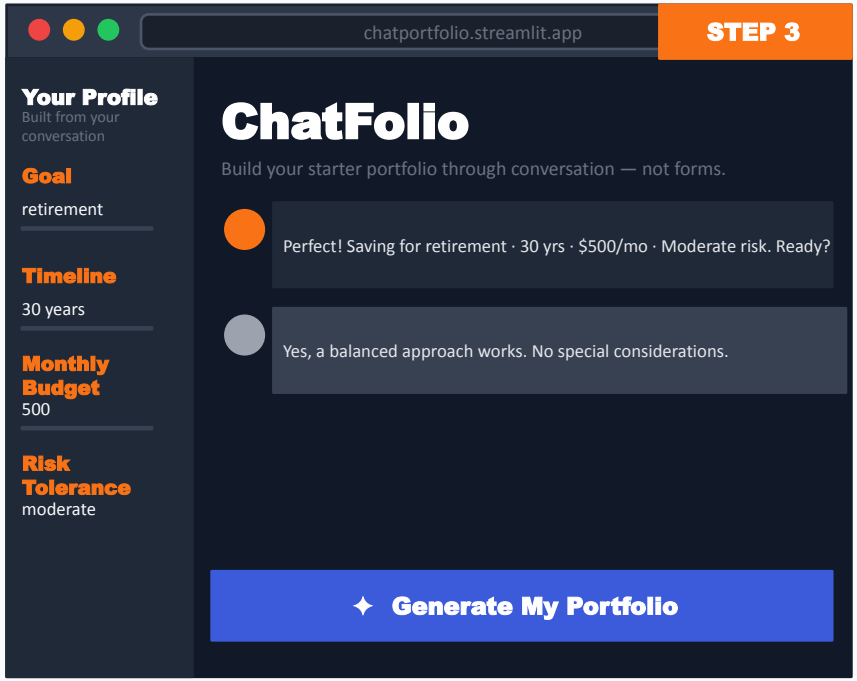
✅ Natural language answers

No dropdowns or number inputs. Users answer in plain English; the AI extracts structured data automatically.

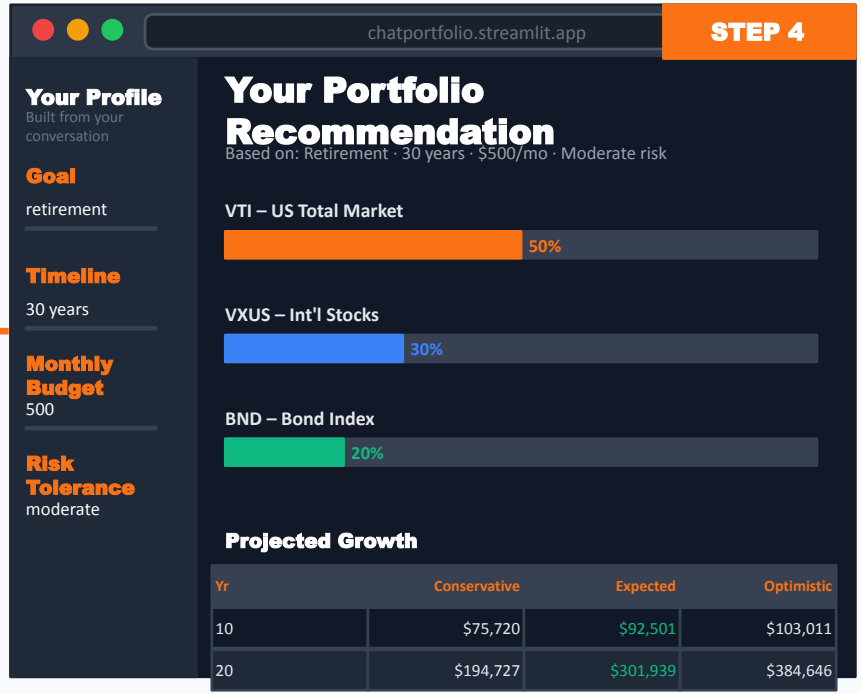
Confirmations before moving

The AI confirms any ambiguity, reducing errors in the final recommendation.

Steps 3 & 4 - Generate & Portfolio Output



User confirms profile ⟶ one-click generation



Fund allocations + growth projections delivered
